POCKETHEALTH FOR PROVIDERS

Auto-Routing

Enable automated, seamless record exchange across your partner sites and referring community.

Create immediate efficiencies with secure workflow automation.

- Enable bidirectional image **transfers at scale**

- Exchange records with organizations **across any network**

- **Save time** by automating workflows and immediate access to imaging records

- **Consolidate image exchange** from a single interface if your facility is a spoke of multiple image exchange platforms

Auto-Routing is included as part of PocketHealth for Providers, and comes at **no added cost** to your organization

Unlock the power of Auto-Routing with the PocketHealth Community Gateway

Enable frictionless image exchange at scale

HOW IT WORKS

1

Transfer imaging records to a partner site through PocketHealth Nexus at your site

2

Imaging records move into the **secure PocketHealth cloud**

3

PocketHealth Community Gateway at partner site **retrieves imaging** from the PocketHealth Cloud

4

Records are pushed to a **predetermined destination** based on previously set **business rules**

*The exchange is bidirectional, your site can receive imaging from partner sites as well

BENEFITS

✓ **Secure image transfer and retrieval** with little or no manual processing

✓ **A self-hosted model** that requires no maintenance from partner sites

✓ **Takes less than an hour to set up** with minimal tech resourcing required

For **more Auto-Routing options** that best suit your organization's needs, please reach out to your PocketHealth Representative
